

Get enterprise shipping performance with popular carrier programs

Programs like FedEx Ship Manager and UPS Worldship have always been the sure way to access 100% of available carrier services. At the same time, Syteline remains the best solution to manage your business. Until now, accessing carriers often meant implementing a costly TMS. ShipLink provides a new, more powerful solution that offers the simplicity and convenience of carrier software with unprecedented control and efficiency – all tightly integrated to your Syteline system in under a day!

CONNECT WITH CARRIERS

ShipLink populates freight and parcel carrier programs with a single click.

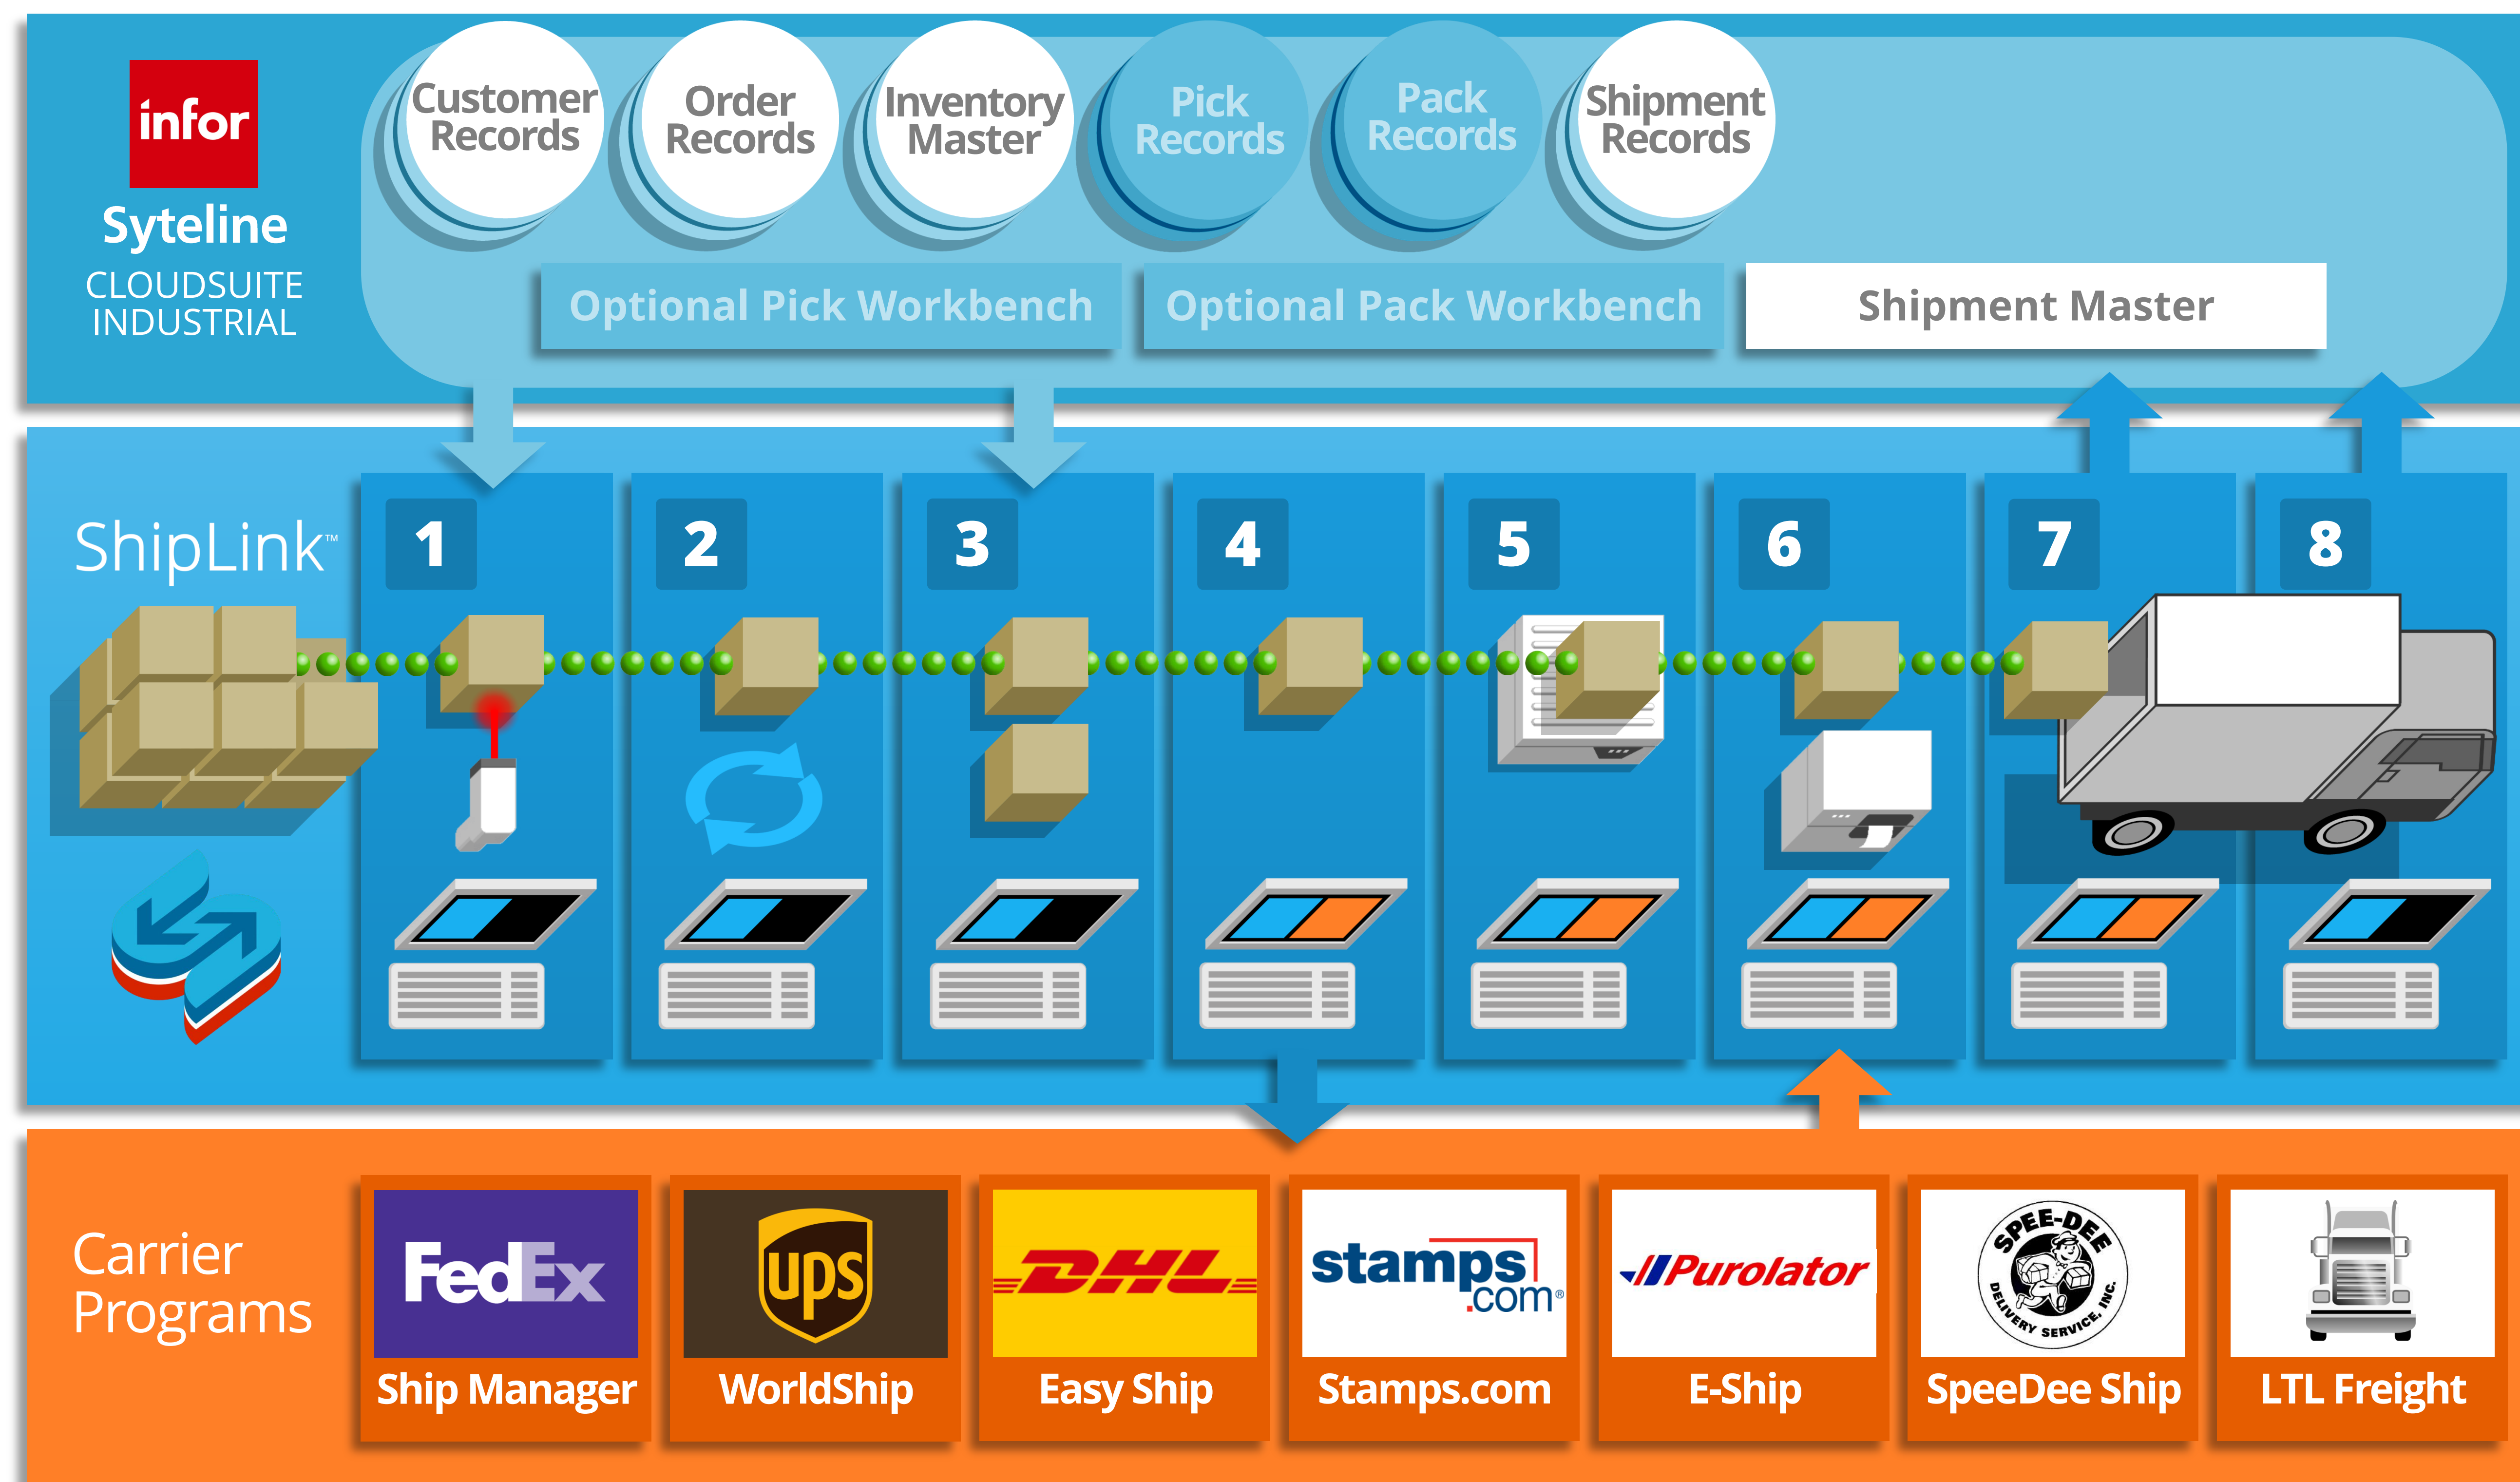

- Supports all versions of Syteline 8 and 9.
- Captures 100% of Order, Customer, Item and Shipment data, including detail required for international shipments.
- Generates custom labels, documents and transaction-based, dynamic email messages and reports.
- Returns shipment data, including customized freight charges and linked tracking information to Customer Order and Shipment Master.

OPTIMIZE DISTRIBUTION

PC-based ShipLink includes powerful configuration tools and management utilities to streamline the entire shipping process.

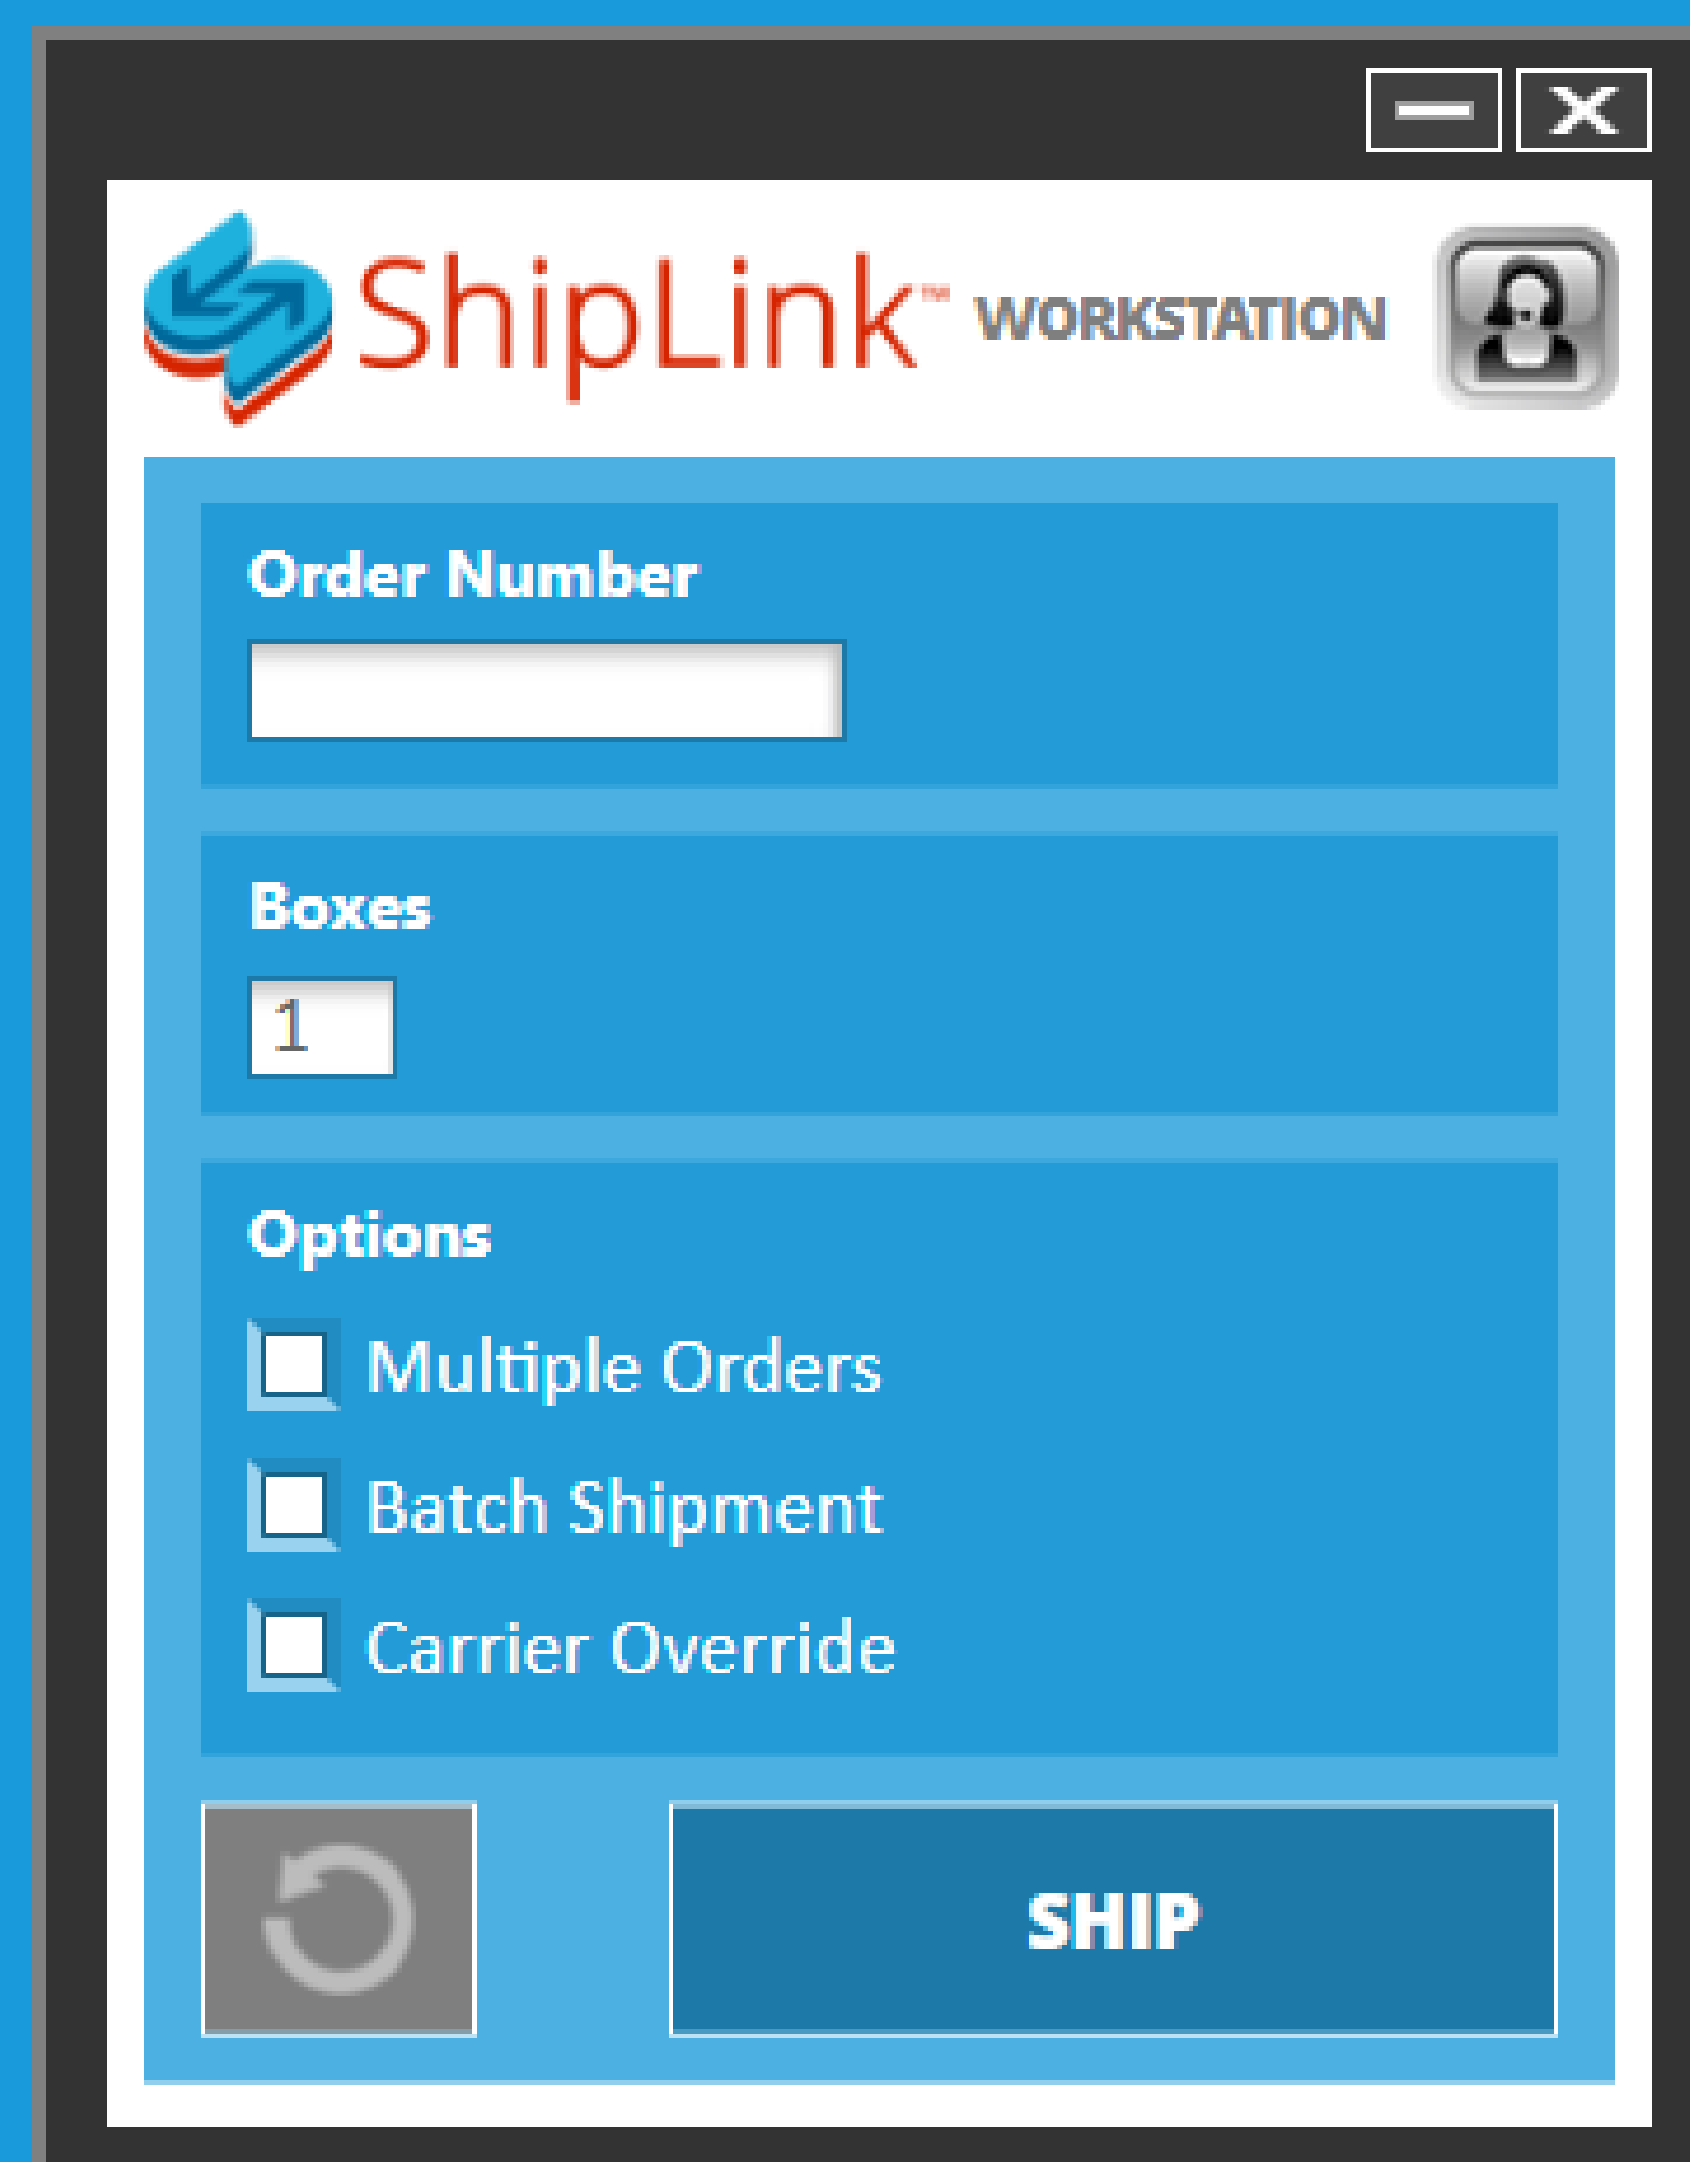

- Replaces manual Pick-Pack operation with simple ShipLink interface.
- Automates carrier account and profile selection based on order data.
- Provides flexible rules engine to query user-defined fields, select services, trigger pop-up alerts, and apply customized freight charges to individual orders.
- Provides real-time LTL rate shopping with hundreds of carriers.
- Supports Pack Workbench and processes container level shipment data for subsequent update of BOL tables and EDI tables for automatic ASN generation.

HOW SHIPLINK WORKS

- 1 Scan** ShipLink instantly captures 100% of Customer, Order, Inventory Master, and optional Pick and Pack data
- 2 Process** ShipLink applies custom business rules to optimize shipment
- 3 Consolidate** ShipLink lets you add Orders, Picks and verifies ship-ability
- 4 Send** ShipLink automatically populates all fields in the selected carrier program
- 5 Weigh** Carrier programs capture weight and optional data
- 6 Ship** ShipLink generates labels and international documents
- 7 Update** ShipLink sends tracking, custom freight charge, order status, and any consolidated shipment data
- 8 Close** ShipLink completes end-of-day process across multiple workstations, and generates custom reports

WHAT SHIPLINK INCLUDES

ShipLink is a Windows PC client application that can run in multiple locations and workstations without any additional server.

• Work Station

This window appears alongside carrier programs for users to scan or enter one or more pick tickets, add cartons and complete shipments.

• Administration System

This menu-driven, point-and-click utility allows for the quick configuration of Syteline integration components, carrier accounts and business rules.

• Cloud Management

This utility maintains workstations, manages site back-ups, and provisions carriers.

START SHIPPING TODAY

ShipLink deploys in hours and can 'go-live' within one day. With its simple interface and use of existing carrier programs, the solution requires little training.

Join the hundreds of users around the world that count on ShipLink to power shipping for businesses large and small.

Get started by calling 657.222.0500 for additional information and to schedule a demonstration.
